Microservices

Java

Spring Boot

Certifications

capacitação em Java e Java Web - epiousion - curso de 80 horas': Java, JSP, Servlet, Taglib, JDBC, HTML, CSS, JQuery.

Git e Github Essencial para o Desenvolvedor - GeekUniversity

Luís Morais

Backend Engineer | Java (17+) | Microservices & Distributed Systems | Cloud (GCP) | API Development
São Paulo, Brazil

Summary

Nice to meet you.I'm a Java developer with extensive experience in modernizing, supporting, and improving applications, focusing on microservices and distributed architecture.I develop applications focused on code quality and performance improvement, maintaining resilience and scalability to deliver solid results.Continuously improving my technical and personal experience to deliver not only excellent applications but also great collaboration and camaraderie in the work environment.Proficient in Java technologies (versions 6 to 21), Spring Boot, messaging, REST APIs, GRAPHQL and SOAP, as well as tools such as Docker, Kubernetes, Redis, Jenkins, and relational and NoSQL databases. Experience with automated testing (JUnit, Mockito, WireMock, Testcontainers) and CI/CD pipelines.Collaborative work in multidisciplinary teams, participating from functional refinement to the technical delivery of solutions. Committed to code quality, clear communication, and alignment with business objectives.Segments served: Critical Platforms, Finance, Insurance (claims), and ERP Sales.

Experience

Foursys
Software Engineer
June 2025 - Present (1 year 6 months)
São Paulo, Brazil

Modernized and maintained high-traffic financial decision-making systems serving 1.2M+ clients and processing 7M+ daily queries.

Led the strategic migration of legacy AS400 connectivity to a cloud-native microservices architecture on Google Cloud Platform (GCP).

Developed high-performance REST and GraphQL endpoints using Java 17, Spring Boot, and Eureka for service discovery.

Ensured system reliability and performance by implementing Redis caching, JUnit testing, and Fortify for code security.

Managed containerized deployments using Kubernetes and automated GitLab CI/CD pipelines.

Zappts
Software Engineer
January 2024 - June 2025 (1 year 6 months)
São José dos Campos, São Paulo, Brazil

Spearheaded the modernization of client portals from Java 7 to Java 21, significantly improving system performance and maintainability.

Architected solutions integrating REST and SOAP APIs, utilizing Spring Boot, Redis, and Jenkins for continuous integration.

Improved software reliability by implementing advanced testing suites with WireMock, Testcontainers, and JUnit.

Operated within a self-managed team, handling the full lifecycle of features from functional refinement to Kubernetes orchestration and production monitoring.

IBM
Software Engineer
March 2022 - January 2024 (1 year 11 months)
Brazil

Executed the legacy-to-distributed transition for a major insurance platform, migrating Java 7 monoliths to microservices (Java 11).

Developed the end-to-end event-driven architecture for insurance claim letters, focusing on Messaging and asynchronous integrations.

Streamlined data processing workflows by implementing Spring Boot services deployed via OpenShift.

Ensured high code quality standards through SonarQube analysis and managed pipelines via Jenkins, Bamboo, and GitLab.

Epiousion IT

Software Engineer
August 2020 - February 2022 (1 year 7 months)
Sorocaba, São Paulo, Brazil

Sales & ERP Management: Developed a custom sales/budgeting engine from scratch, automating complex workflows of partial approvals and sub-orders via REST APIs.

Financial Integrations: Built a Java/Spring Boot solution for CNAB 240/400 bank slip conversion, integrating with major Brazilian banks (Itaú, Bradesco, Santander, etc.).

Legacy Modernization: Maintained a legacy ERP (Java 8, Struts, JSP, MySQL) while leading its modernization by exposing new Spring Boot REST endpoints.

Infrastructure: Orchestrated local development and deployment environments using Docker and Jenkins, documenting all services with Swagger.

Education

Universidade de Sorocaba
Curso Superior de Tecnologia (CST), Análise e desenvolvimento de sistemas · (2019 - August 2022)
